

Blumoo

Universal Home Entertainment "Accessory"

Blumoo

Blumoo (www.blumoo.com) is a universal home entertainment accessory providing users seamless control of the audio and visual equipment already installed in their home utilizing an innovative blend of Bluetooth 4.0, infrared, and an app-enabled iOS or Android device.

Blumoo HomeBase

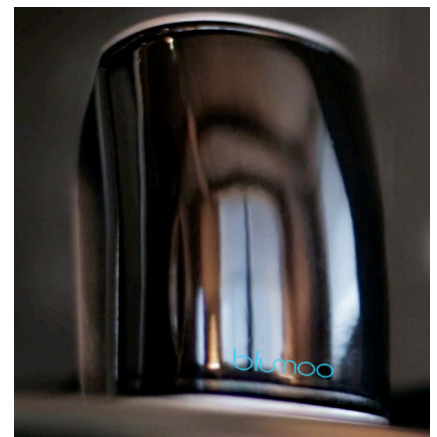

Dimensions: 2.24 in x 1.96 in x 2.81 in

Materials: Injection mold semi-translucent polycarbonate
(100% of the product engineering is done in the United States)

Blumoo is designed to be sturdy, elegant, and unobtrusive

Features:

- Sleek, minimal design, easy to hideaway in a component cabinet
- Integrates a powerful infrared transmitter that connects to any home entertainment system
- Users are able to use Blumoo as a universal remote for more than 200,000 TVs Blu-ray players, cable provider boxes and allows users to stream internet radio or your favorite music through your existing stereo system

Blumoo App

Installing the Blumoo app gives mobile devices control of the stereo system, even from outdoors or other rooms throughout the house. Controlling all of your home entertainment devices from your smartphone or tablet has never been easier.

Features:

- Your iOS or Android device becomes the only remote control you need
- Supports five simultaneous mobile device connections
- Blumoo App is a free download (requires Blumoo Homebase for operation)
- The Blumoo Mobile App provides show recommendations based upon your viewing history
- Open API and SDK creates limitless possibilities for developers
- The Blumoo App gives reminders for your favorite shows and teams
