

CLEARPOWER BATTERY BACKUP

In a world of uncertainty, even small reassurances matter. Having access to communication is so important. The ClearPower Battery Back-up & Portable Charging Unit provides that sense of certainty that anytime, anywhere, you have power to use your phone or tablet. Whether it is your home phone or cell device, ClearPower is there to ensure you have power when & where you need it.

For any telephone that has AC power, ClearPower will serve as battery back up in the event of a power outage. Specifically designed to maintain all of the features the phone has including amplification, tone controls, answering machines & cordless transmission. The CP will offer up to three days of back-up power to an amplified landline phone, more for phones with fewer features. The LED screen indicates the battery life remaining.

We designed this unit to be powerful enough to support all of our ClearSounds Amplified Telephones as well as all amplified & standard landline phones. As a portable charging unit, ClearPower gives you maximum charging power. You can charge your tablet 2 times or charge two simultaneously. You can charge your Smartphone 4x or two simultaneously 2x before the ClearPower will need to be recharged.

Most portable charging units that offer dual jacks do not offer 2.0A jacks, making it impossible to charge two tablets simultaneously.

ClearPower is a critical investment in your security & safety.

FEATURES

- 7800 mAH Samsung Lithium Ion rechargeable battery cells
- LED Battery life indicator
