

Single Source Distribution Module

AB-203

When creating an A-BUS audio system, Channel Vision's single source A-BUS distribution module will allow you to distribute an output from your home entertainment system or any single audio output device such as a CD player, MP3 Player, or XM radio. This system communicates through CAT5 wiring by sending the audio signal to the distribution panel (AB-404), then to the amplified keypad(s) (AB-124).

Features

Single CAT-5 output for audio distribution
Single source input
Two IR emitter outputs and routing for control of external equipment
Status and IR feedback indicators

Specifications*

Operating Voltage: 24 ± .5VDC

Cable Requirements: CAT-5 or better

Max CAT5 length: 250ft

Speaker Impedance: 6-8 ohm

IR Repeating: 30-60kHz

Operating Temperature: -10°C to +50°C
