2-Zone Bluetooth Audio Kit

AB-911

The AB-911 Bluetooth Audio Kit includes the A-Bus® 2-zone distribution hub, AB-303 Bluetooth audio streaming module and two volume control keypads. The 1 x 2 distribution hub delivers audio to two amplified volume control keypads and allows a secondary source to be connected that will act as a local source override. The AB-412 is equipped with an extension output that give users the option to hook up additional distribution hubs.

System Configurations
