

DP-8000

SIP IP Intercom

Key Features

IP-based video communication

IR night vision camera

Illuminated door button

Built in strike relay, normally open and closed

Smart phone app communication

Channel Vision's IP Intercom Door Station combines SIP protocol with video communication to provide an attractive IP Intercom solution to front door and gate strike control. The IP intercom system can be used with Channel Vision and RTI Touch Screens. Guests simply push the button to ring the homeowners touch screen, mobile phone, smart phone, RTI Touch Screen CX10, both inside the home network and remotely to their mobile phone.
