SecureNet 3G AT&T & Vodafone Cell Radios for GC2

Nortek Security & Control is pleased to announce the addition of two (2) new SecureNet 3G cell radios for GC2 that work with AT&T and Vodafone networks. These radios will give dealers more flexibility when installing systems in the U.S., Canada, and select countries of the Caribbean. The AT&T radio will work in U.S. only, and the Vodafone radio will work in Canada and select countries of the Caribbean.

NOTE: The new cell radios require FW v1.17.0.3 on the GC2 panel to work correctly.
