

Telguard HomeControl for 2GIG Go!Control Panels

Today consumers expect much more than a traditional security system. They expect the ability to interact with, and control, their system using one well-designed system at an affordable price.

Telguard HomeControl allows dealers to offer cellular connectivity, interactive services and life style management, through one Go!Control-inspired user interface.

HomeControl OneRate Plan

This single, all-in price enables dealers to more effectively upsell interactive features, and capture higher RMR in today's highly competitive security market.

HomeControl OneRate includes:

- Telguard cellular connectivity.
- Remote arming.
- Unlimited sensors.
- Z-Wave automations & schedules.
- Upload/download.
- End user notifications.
- Live & event based video.
- Two-way voice.
- 500MB or 21 days of video storage.

Video with OneRate

The Telguard TGHC Camera delivers event-triggered video clips or images, or streaming video to a smartphone or computer. Built-in speakers and microphone enable two-way voice communications with the panel.

With the OneRate plan you can add up to 10 full motion cameras sharing 500MB of video storage per month to any system, for no additional charge.

Seamless User Experience

Telguard HomeControl provides a seamless user experience by delivering a sleek portal and mobile interface complementary to the Go!Control look and feel.

Whether your accessing your system from the Go!Control panel, remotely using your mobile device or the HomeControl online portal, Telguard offers a consistent visual appearance to facilitate ease of use.

TELGUARD HOMECONTROL

Beyond Basic Interactive

HomeControl goes beyond the basic interactive service of arming and disarming by offering the ability to tie into all the security panel's events, such as motion detectors and door sensor information.

2GIG panels powered by Telguard HomeControl for life safety are over-the-air upgradeable to offer life style features, making upselling interactive services much easier after the initial installation.

Seamless Mobile App

Created by a world renowned design firm, Telguard HomeControl's mobile app matches the sophistication and style users expect to see on their iPhone or Android devices. The app also mirrors the look of the Go!Control user interface providing one seamless user experience.

Consumer-Friendly Online Portal

The Telguard HomeControl online portal lets your customers quickly and easily enter account information, contacts, authorized users, and manage their system seamlessly from anywhere, using any standard web browser.

To Order

For your 2GIG solution with HomeControl order item number 2GIG-GC3GA-T.

In Canada, all Telguard products and services are offered and sold under the Telular brand.
