ON CONTROLS:

The Premiere Cloud Stored Control System

On Controls is a full control and automation system that uses your powerful iPad, iPhone, iPod Touch, and Android devices. Using our cloud-based programming and file storage along with our wired or wifi controllers, On Controls can be used to build any size system with almost any size budget from a basic family entertainment room to an entire estate with our open-source platform.

- **ON-Link allows legacy devices to be controlled RS-232, Contact Closure, and IR**
- **Robust Wired and Wifi controllers allow easy installation and expandability**
- **With more IP-enabled devices, our application speaks IP direct without the need of an add-on IP processor**

ON-Link Hardware

Part	Description
WIFI-IR3	WIFI-IR3 WIFI Processor with 3 Routed IR Ports
