Control Product of the Year

On Controls for Dealers

World-class control for professionals.

Engineered, developed, and supported by the same team behind the award-winning iRule platform, professional integrators love On Controls for the value, flexibility, and tremendous opportunity the price point offers.

Each customer license includes all the innovative audio, integration, and security modules you'll need for most any project. Simplicity is the key, and with On Controls Ultimate, every customer's license is the same low price. Integrate powerful system control plus rich, interactive media content streaming, lighting, hvac, security, or access control, and deploy it in a customer's installation in minutes. Really!

On Controls by iRule simply gives the installer the flexibility to add powerful control to any room – faster and easier than the competition.

Program less. Make more.

On Controls Advantages

Simple

On Controls uses *no programming* and simple drag-and-drop actions to create and modify the remote interface. Get to work instead of spending time and money on expensive training.

Flexible

On Controls allows installers to customize the user interface and tailor it to the needs and desires of the customer. Add customer images, floor plans, photos, logos, and more.

Remote Setup and Maintenance

Build projects "in the cloud", and modify a customer remote without truck-roll to the customer's home or business. Generate revenue with fast, easy changes and additions.

Beautiful

On Controls offers installers a library of images to customize the interface without the need to spend hundreds or thousands of dollars on a designer or a separate graphics package.

Fast

Using On Controls' library of templates and images customized for installers, projects are complete in hours – not days. Experienced users can configure a remote in fifteen minutes!

Expandable

Easily add rooms, equipment, or capabilities to any system.
