**Backward compatible
with all existing
alarm panels.**

**Compatible with all
DVR / NVR & ONVIF
compliant cameras.**

Choose from our wide range of indoor and outdoor security sensing solutions utilizing laser, active and passive infrared detection technologies.

RLS-2020 Series

HIGH SECURITY:

REDSKAN Mini high security laser scan series. Indoor & outdoor detection capabilities ideal for above ceiling or below floor detection, rooftop, wall, gate, or perimeter.

RLS-2020S: 97.5ft radius arc, 95° detection angle, outdoor / indoor
RLS-2020i: 65 x 65ft, 95° detection

RLS-3060 Series

HIGH SECURITY:

REDSKAN high security laser scan series. Detects moving object's size, speed, and distance from the detector for high-reliability detection with minimal false alarms. 190° detection arc, vertical & horizontal mounting.

RLS-3060SH: Up to 165ft h. coverage
RLS-3060L: Up to 100ft h. coverage

SL-350QFRI

PERIMETER:

350ft wireless battery-powered outdoor point-to-point perimeter detection powered by Inovonics. Quad beam active infrared detection with 4-8 years battery life, super low infrastructure cost, eliminating the need for trenching or wiring.

HX High Mount Series

HIGH MOUNT SPOT PROTECTION:

Stable outdoor dual passive infrared detector allowing accurate detection of human presence while avoiding false alarms caused by nuisance animals.

HX-40 Series: 40 x 50ft, mounting height 8-10ft
HX-80 Series: 80 x 6ft, mounting height 8-10ft

BX Shield Series

IMMEDIATE BOUNDARY:

Quad PIR sensors ideal for protecting windows and the immediate boundaries of a building or site. Combining great usability and versatile design. Includes 2 PIRs on each side of the unit for up to 80ft detection range (40ft per side with independent adjustability).

Fitlink Series

SHORT RANGE LOW MOUNT:

Dual PIR providing chimes, events, notifications, and even standard intrusion alarms, and include a 5 year battery life with transmitters to communicate to most residential & small business security needs. Will not be triggered by false alarms caused by extreme weather conditions and pets.

APPLICATIONS

Agriculture

Vacant Buildings

Construction Sites

Remote Locations

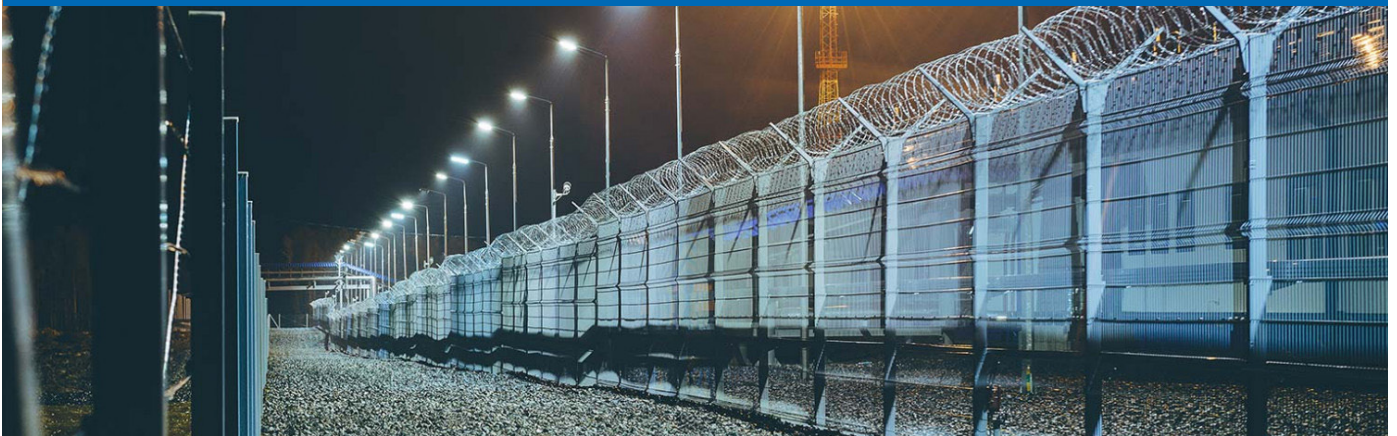

Access Points

Fenced Yards

Perimeter
