

Code Encryptor II

CE2Y-2

Wireless keyfob offers convenience & control.

Our Code Encryptor sends one of four billion possible codes, randomly changing every time you press the button. The Code Encryptor will provide security and peace of mind today, tomorrow and in the future.

Convenience

- Easily adds to any home alarm system to turn it on and off.
- No need to remember codes to arm and disarm alarm.
- Plug and play installation.
- Add remote controls for every family member for security, safety and convenience. (up to 7 remotes)

Peace of Mind

- No improvement in technology of a "code grabber" will ever be able to bypass this state-of-the-art security.
- Add a panic button for emergency situations.
- Reduces user error and false alarms.
- Access to home, garage door and police via a keychain remote.

Functions

- Arm, disarm and panic...directly through the data bus using no zones
- Garage door access...up to 2 doors using secure encrypted codes
- Easy installation... self-identifies to virtually any panel
- Additional relays on board
- LED status light
