

# THE FUTURE OF DIABETES MANAGEMENT

***Connected care is here.***

**THE TELCARE BLOOD GLUCOSE METER (BGM)** is a stand-alone, wireless device that empowers you and your care team to proactively manage your diabetes.

## TEL CARE SOLUTION OVERVIEW

**TELSERVE:** When you take a glucose reading, the wireless technology in the meter uploads your testing data to this secure, HIPAA-compliant, cloud-based server. From there, it is up to you to decide where your data goes — and how to manage it.

# WORLD'S FIRST WIRELESS ENABLED METER

## EMBEDDED WIRELESS MODULE

- Automatically uploads test data to the Telserve database using a wireless network
- Stores 300 of the most recent readings on the meter and all of your past data on our secure server

## LARGE COLOR SCREEN

- First full-color screen on a blood glucose meter

## AUTO-CODING TECHNOLOGY

- Test strips automatically calibrate with the Telcare BGM®
- Only requires a small blood sample

## POST-TEST MESSAGING

- Message appears after each test
- Personalized messages can be sent to the devices based on your preferences

## TELCARE BGM® SPECIFICATIONS

- |                                                |                                                           |
|------------------------------------------------|-----------------------------------------------------------|
| ● <b>Test Strips:</b> Telcare Test Strips      | ● <b>Dimensions:</b> 100L X 60W X 15H mm                  |
