

Important Note

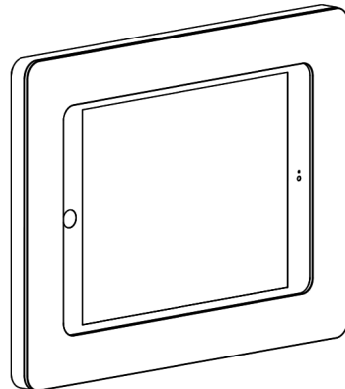

This part includes the BASE of the wall-mount enclosure only.
You must also purchase a matching COVER of the wall-mount enclosure.
The COVER used can be changed at time.
See COVER instructions for additional information.

G Install "Cover" Piece onto "Base"

Lastly, align the separately purchased cover onto the base. Be sure that the (7) mechanical "snap" buttons are aligned.

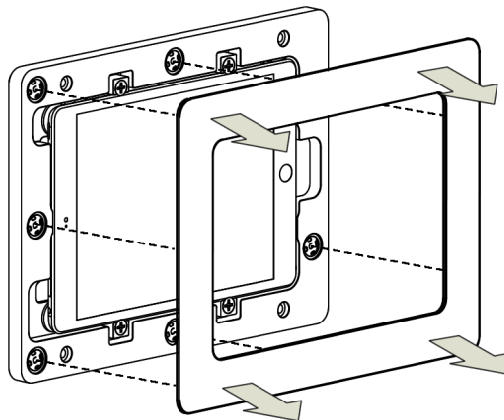

PRESS FIRMLY until the cover snaps into place.
We are now complete with the install!

H To Access the Installed Tablet / Remove "Cover"

To remove the cover, simply apply pressure onto the edges of the cover, and lift away from the base.

The (7) mechanical snaps will release the cover, allowing the tablet to be accessible.

This part includes the BASE of the wall-mount enclosure only. You must also purchase a matching COVER of the wall-mount enclosure. The COVER used can be changed at time. See COVER instructions for additional information.

Component Checklist

VidaMount
On-Wall
Mount
(Base only)

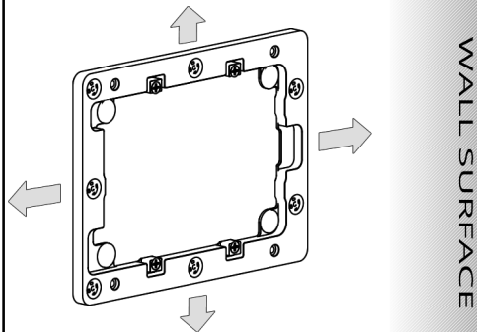

(4) Wall Anchors

(4) Button Head Wall Screws

A Position the On-Wall "Base" Piece

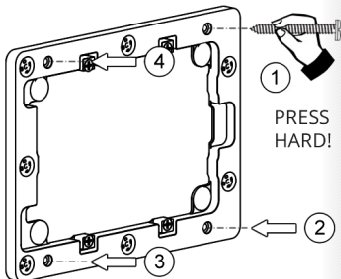

Place the BASE piece onto the wall, where we plan to permanently affix it.

Be sure you are happy with its position before proceeding further.

DO NOT AFFIX / INSTALL IT ONTO THE WALL YET.

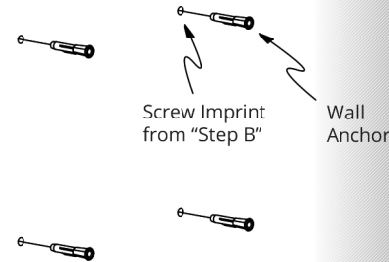

B Mark Anchor Positions with a Wall Screw

With the BASE piece positioned where you'd like it to be installed, take one of the included wall screws, and use it to mark the (4) anchor locations.

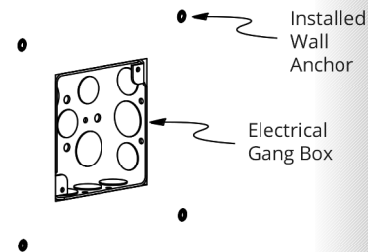

Push the screw FIRMLY into the (4) anchor positions so that an imprint is left on the wall.

C Install Wall Anchors

With the (4) anchor positions marked, install the (4) included wall anchors.

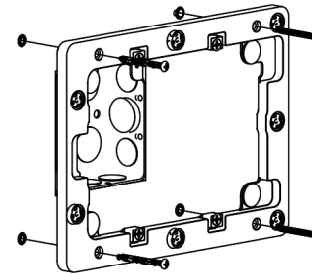

D Optional : Install Gang Box

OPTIONAL:

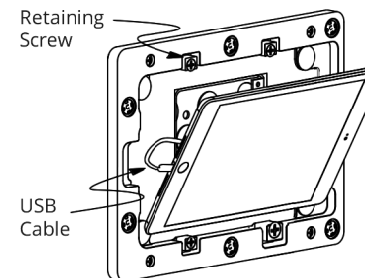

To provide space for charging hardware (such as our VidaPower adapter), please install a gang box into the center of the (4) anchor locations.

E Install "Base" Piece onto the Wall

Using the (4) included button head wall screws, install the BASE piece onto the wall now.

F Connect Power, Install Tablet into Base

OPTIONAL: If a power solution is in place, connect the power solution now to confirm it's working.

Afterwards, install the tablet into the BASE piece, as shown on the left.

IMPORTANT: To prevent scratching / marring, use a screw driver to remove the (4) metal retaining screws, insert the tablet, and then reinstall the (4) retaining screws.
